

Centre Spears

The Hunting Centre Spear is designed as a “last resort” fishing tool, to retrieve broken wireline from the well. This tool is not recommended for general wireline fishing operations. The Centre Spear should only be used in cases where the wire is balled up so badly that it is impossible to get hold of it with a standard two-pronged grab.

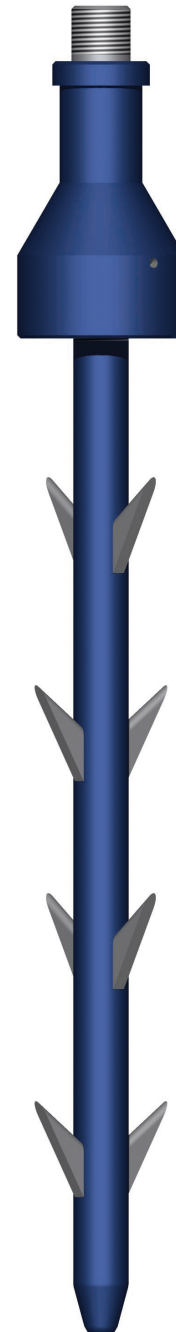

Once wire is wrapped around this tool, it cannot be released until it reaches the surface.

The Centre Spear is deployed into the well attached to a fishing toolstring by means of a dummy rope socket and pulling tool.

 The Centre Spear should only be used in cases where the wire is balled up so badly that it is impossible to get hold of it with a standard two-pronged grab.

CENTRE SPEARS				
Size	Length	Fishing Neck	Connection	Part Number
1.500"	22"	1.375"	15/16" UN	052CSP-XXXX-00
1.875"	22"	1.750"	1 1/16" UN	052CSP-XXXX-00
2.500"	22"	2.313"	1 9/16" UN	052CSP-XXXX-00

2.213" Centre Spear would be Part No. 052CSP221300
 Bespoke sizes available upon request.
